

Dear Fellow Members

I hope that you have been enjoying the games.

I must say that I do not peek at the answers from the week before until I am getting them ready to forward on. And oops! some that I thought were correct turn out to have a different answer to mine.

However, I did find a real incorrect answer that you need to know about.

Conversion of binary to decimal: Exercises 1-20

The correct answer to Number 16 is 51.

Have fun with this lot. Cheers, Janice.
