The Speakers

Dr Jane Genovese and Dr Peter Langlands are passionate about sustainable living and cultivating strong community connections. They co-founded the grassroots community group, Transition Town Guildford, and have run over 100 sustainability events for their local community over the last 5 years. They lecture on behaviour change and sustainable living at Murdoch University.

The Premise!

October's City Lecture is a crash course in sustainability - what we need to know and do. Have you ever felt overwhelmed by the current state of the environment? Want to learn how to be a good ancestor and lower your ecological footprint? If so, come along to this talk by Dr Peter Langlands and Dr Jane Genovese. You'll hear the latest science and learn what action you can take to make a difference.
